

## *Written Examination*

Upon being admitted into candidacy, the applicant is eligible to register for the written examination. The candidate will have seven years from the date of admittance into candidacy to complete the entire certification process. The candidate may not take the written examination more than three times during the seven year period of candidacy.

The written examination consists of multiple choice questions in five domains: Neuropsychological Assessment, Clinical Neuropsychology, Basic and Clinical Neurosciences, Behavioral (Clinical) Neurology, and General Clinical Psychology. Questions for the examination are referenced to classical and current literature and explore principles and factual knowledge with which all Clinical Neuropsychologists should be familiar. The examination takes approximately two hours to complete.

Beginning in 2012, the ABCN written exam will be administered electronically at Prometric Centers across North America. Registration will still be done through Ms. Annunciata Porterfield at the ABCN office, but the exam will be taken at a Prometric center in or near the Candidates' home towns.

The written exam will be available at Prometric Centers during four 2-week time frames over the course of the year. Written Exam Dates for 2012 are:

March 1st to March 17th  
June 1st to June 16th  
September 1st to September 15th  
December 1st to December 15th

Candidates should complete the Written Examination Registration online: <https://www.abpp.org/i4a/pages/index.cfm?pageID=3543> which includes the fee of \$300. Once completed the ABCN Administrator will confirm your date/time.
